The Society for Experimental Biology and Medicine has been deeply moved by the death of its revered founder, Samuel James Meltzer, who, from the beginning of its career, was the Society's devoted mentor and the personification of the Society's spirit and ideal. Meltzer was eminent for many important contributions to biology, physiology, pathology, pharmacology, and scientific medicine. Most of his contributions to the advancement of science, after the Society's establishment in 1903, were made originally at meetings of this Society. He was a distinguished promoter of the application of experimental methods to research in American medicine. His foundation of this Society was a particularly important means of accelerating that significant development in this country. He was an enthusiastic embodiment of the spirit of zealous research, and an ardent exponent of idealism in science and...
