Not illustrated. 1873 Excerpt: . . . science is becoming so vast, that it might be well to have them much more local and special in the treatment of their themes than most of them now are. Let the more foreign facts be relatively few, while the discussion of home areas are made especially full and clear. For example, there is an essential similarity in the geological structure and relations of the Western States. We need here chiefly a full and distinct account of the so-called Paleozoic rocks, which extend from the coal measures down to the lower Silurian, with also a full account of our surface geology, including the drift and the drift theories. Other formations should not be ignored by any means, but should be treated with far less fullness. A text-book which, for example, should give only a little space to the coal measures which spread over large portions of Pennsylvania, West Virginia, Ohio, Indiana, Kentucky, Illinois, Missouri, Iowa, etc. , is not well suited to teach geology to the youth of these states. A good text-book should be illustrated with distinct and beautiful figures of the more interesting and important fossils. If it gives the information most interesting and most prized, it will be likely to be the most useful as a means of education. With such a text-book and with bright and earnest teachers the study of geology in our public schools may be made a powerful stimulus to the growth and culture of the youth of...
