

Performance analysis of MPLS based networks with conventional networks

By Tahir, Junaid

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Most of the organizations around the world demand the communication system that is more reliable, secure, cost effective and efficient. So VOIP (Voice over IP) can fulfill this requirement when it is implemented by using some different network technologies like MPLS (Multi Protocol Label Switching) with IPv4 that enables Differentiated Quality of services over the network. This Book will provide detailed performance analysis of networks by performing different experiments. In Conclusion outstanding results have been achieved for VOIP over the MPLS based network. | Format: Paperback | Language/Sprache: english | 64 pp.
