RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 42 pages. Original publisher: Washington, D. C. : U. S. Dept. of Labor, Bureau of Labor Statistics, Office of Productivity and Technology, 2004 OCLC Number: (OCoLC)216656214 Subject: Computer use wage premiums. Excerpt: . . . The respondents were also asked which software application they spent more time on. While they were free to answer any specific application, the answers were then coded into one of fourteen types of software applications listed in Table 3. There are significant differences in the most frequently used applications by occupation. Managers and professionals were most likely to use word processors as a primary application. Other occupations were most likely to use specialized office applications. Computer usage is thus a fairly heterogeneous concept across workers. IV. Wage Differential for Computer Use A. Cross-section estimation In order to verify that our data yield similar results to those used in previous work, we first estimate a pooled cross-sectional wage equation with the computer use variable as the explanatory variable of interest. Specifically, we estimate: lnW X Comp (7) it it it it where W is individual is hourly wage rate at time t;...
