This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Household water treatment (HWT) is increasingly being promoted as a rapidly implementable and cost-effective interim approach to improve water quality. It is a key preventive component of the WHO/UNICEF comprehensive strategy on diarrhoea control. This book, for the first time, sets forth global criteria that enables users to evaluate whether an HWT option reduces waterborne pathogens sufficiently to protect health. Through use of a risk-based framework and by emphasizing the philosophy of incremental improvement, it is intended to provide implementers and policy-makers with an evidence-based and pragmatic approach to select options suited to local conditions. This book provides a range of technical recommendations, including: - A step-by-step overview of how to evaluate HWT microbiological performance - Elaboration of health-based water quality targets ranging from interim to highly protective, including establishment of default targets for use in data-scarce settings - Description of technology-specific laboratory testing protocols and guiding principles - Considerations relating to developing national technology evaluation programs. This book is especially intended for resource-scarce settings where...
