

Quasiconformal Space Mappings: A Collection of Surveys 1960 - 1990

By -

Springer. Paperback. Condition: New. 150 pages. Dimensions: 9.2in. x 6.1in. x 0.4in. This volume is a collection of surveys on function theory in euclidean n -dimensional spaces centered around the theme of quasiconformal space mappings. These surveys cover or are related to several topics including inequalities for conformal invariants and extremal length, distortion theorems, $L(p)$ -theory of quasiregular maps, nonlinear potential theory, variational calculus, value distribution theory of quasiregular maps, topological properties of discrete open mappings, the action of quasiconformal maps in special classes of domains, and global injectivity theorems. The present volume is the first collection of surveys on Quasiconformal Space Mappings since the origin of the theory in 1960 and this collection provides in compact form access to a wide spectrum of recent results due to well-known specialists. CONTENTS: G. D. Anderson, M. K. Vamanamurthy, M. Vuorinen: Conformal invariants, quasiconformal maps and special functions. - F. W. Gehring: Topics in quasiconformal mappings. - T. Iwaniec: $L(p)$ -theory of quasiregular mappings. - O. Martio: Partial differential equations and quasiregular mappings. - Yu. G. Reshetnyak: On functional classes invariant relative to homothetics. - S. Rickman: Picards theorem and defect relation for quasiconformal mappings. - U. Srebro: Topological properties of quasiregular mappings. - J. Visl...

Reviews

This publication will never be effortless to begin on studying but extremely entertaining to learn. It is probably the most incredible publication i have go through. I realized this ebook from my i and dad suggested this publication to learn.

-- **Austin O'Connell**

This ebook is great. I am quite late in start reading this one, but better then never. I am just easily will get a satisfaction of reading through a composed pdf.
